Net Profit after Tax	₹ Crore	118.90	241.96	818.96	808.04

Consolidated sales turnover in the third quarter (July-September) of the year was ₹ 2508.65 crore, as compared to ₹ 2542.37 crore in the corresponding quarter last year.

Operating EBITDA in the third quarter declined to ₹ 286.56 crore against ₹ 466.07 crore in the corresponding quarter of the preceding year. Reduced profitability during the quarter is attributed to sluggish market conditions and lower realizations.

Overall, the macro-environment continued to be dull and characterized by slow industrial and agricultural growth, rising prices and volatile foreign exchange rates. There were increases in the prices of diesel, coal and railway freight which could be countered partly through the company's ongoing initiatives to achieve improvements in operations, sales and logistics.

Work on the ongoing Jamul expansion project is progressing well with all the main structures now above ground. Work has also commenced at the Sindri site and is moving ahead on schedule.

While the extended monsoon is expected to have a favourable impact on the agricultural sector in coming months, we foresee a gradual but slow improvement in demand for cement and in the overall economy which may need some more time to recover.
