## ACC unveiled a new range of innovative and sustainable products during COVID-19

- Launches ECOPact, ACC Thermofillcrete, ACC Suraksha NX Antiwashout Concrete and ACC ADMIX

**Mumbai, 21<sup>st</sup> April 2021:** ACC Ltd, one of the leading producers of cement and ready-mix concrete in the country, launched new innovative products during the COVID-19 pandemic. These launches demonstrate the commitment to be one of the most innovative and sustainable companies in building solutions in India.

By developing these cutting-edge building solutions, ACC aims to drive efficiency and deliver better value for commercial as well as individual customers. The differentiated properties of this innovative product line is bolstering acceptance across markets.

Mr. Sridhar Balakrishnan, MD & CEO, ACC Limited said, *“Our ability to predict market requirements and identify consumer preferences has enabled us to launch products backed by extensive research. We want to give our customers solutions that not only enhance durability but are environment friendly. The expansion of our portfolio with the launch of ECOPact, ACC Thermofillcrete, ACC Suraksha NX Antiwashout Concrete, and ACC ADMIX will unveil possibilities for new-age construction”.*

“ACC Suraksha NX Anti washout Concrete” was developed through advanced R&D. It is a high-performing anti-washout concrete which enables customers to pour the concrete without worrying about the high-water table in their foundation. The innovative product mix has a rapid setting time of approximately 2 hours and maintains the desired properties of concrete even when poured on surfaces with high-water content.

To deliver added value to customers, ACC launched “ACC Thermofillcrete”, a superior quality concrete that can dissipate heat and help lower the cost associated with excavation, backfilling and compaction.

ACC also launched “ACC ADMIX”, a concrete additive mixture range, under its Solutions & Products segment. The ACC ADMIX range is a new generation polymer which is designed to impart exceptional performance in concrete.

In line with sustainability priorities, “ECOPact”, a ready mix green concrete for high-performing, sustainable and circular construction was also launched. This is the first green concrete range launched in India and was brought from the parent LafargeHolcim. The aim is to give eco-conscious customers a choice to significantly reduce the carbon footprint of buildings. The innovative manufacturing process reduces CO2 emissions by up to 100%. Its introduction in the Indian market enhances the sustainable product offerings for the construction industry. This new sustainable product range has already been launched across 6 cities in India.

ACC has been a pioneering brand with a history of 'Category first' innovations. It continues to consistently set new benchmarks by leveraging its own and parent LafargeHolcim's expertise in research and innovation backed product development.

---

**About ACC Limited:**

*ACC Limited, a member of the LafargeHolcim Group, is one of India's leading producers of cement and ready mix concrete. It has over 6,400 employees, 17 cement manufacturing sites, 80 concrete plants and a nationwide network of over 56,000 channel partners to serve its customers. With a world-class R&D centre in Mumbai, the quality of ACC's products and services, as well as its commitment to technological development, make it a preferred brand in building materials. Established in 1936, ACC is counted among the country's 'Most Sustainable Companies' and is recognised for its best practices in environment management and corporate citizenship.*
